2.1.16

FB \$113 probably turned up

The sub \$110 trap in Facebook may have been the bottom of the forecast wave iv. If that is the case the courtesy dip scenario is a setback towards 111.50 or so. \$109 is still possible in this ridiculous world of volatility.

FB 111.50 wave IV correction spot on for now

I guess if there is still any one stock left worth owning it may be Facebook. What concerns me here is that this top may already be done and dusted. The 38% correction is below \$109 so there is more real estate available below and tomorrow might be a buying opportunity.

FB \$114 It was TIRED...

Looks like the froth I noted earlier was the top of wave iii in Facebook and now prices should back and fill for a while, possibly even visiting 110 prior to resuming a climb to new all time highs. Hopefully we can find something to do along the way...

FB \$117.25 and getting tired

I am pretty confident that FB will trade above \$120, and hopefully twice! That being said the risk/reward gets worse as that level nears. The wave 4 scenario should be a textbook courtesy dip setup.

FB \$115 Close Bullish, but vulnerable

I don't know what kind of a "moon shot" Facebook is on but a gap and go Tuesday would suggest that \$130 is coming before a \$5-10 wave iv courtesy dip sets up. For now support is around \$110.

FB 11.40 ascent should be slowing into a blowout peak

Facebook has had an unbelievable run off the sub \$90 bear trap I identified with the stock trading at \$93. Based on a midway gap assumption I think wave iii should be close to blowing out a peak.

If this is a lead story on the financial news a buying climax should be near.

FB (92.50) Bear Traps \$90

Relative to many others FB has held up pretty well and what will be important is what happens tomorrow, specifically what happens if today's HIGH is exceeded. I was watching this one develop early on but it was not until the name popped that it was clearly a bear trap below \$90 today. Any self respecting trap needs a least a \$5 move to close out so another put sell scenario for a volatility crushing bounce and/or consolidation.
